Senior Fitness Test Manual, Second Edition, offers the most comprehensive and reliable test battery for assessing physical fitness in adults ages 60 and older. The tests in this resource assist health practitioners and fitness and rehabilitation specialists in identifying weaknesses that cause mobility problems, developing exercise programs that improve functional fitness, preventing future mobility issues, and evaluating progress. The Senior Fitness Test (SFT) is a simple, economical method of assessing the physical attributes that older adults need in order to perform daily activities.
