The politics behind U.S. environmental foreign policy on climate change

By Karl Lemberg

GRIN Verlag Aug 2010, 2010. Taschenbuch. Book Condition: Neu. 229x147x23 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2004 in the subject American Studies - Culture and Applied Geography, grade: 1,0, University of Potsdam, course: International Environmental Policy, 19 entries in the bibliography, language: English, abstract: Climate change is the extraordinary warming of the Earth from increased concentration of greenhouse gasses (GHG)¹ and the climate consequences of that warming, which can be in many ways harmful to humans and the environment.² In the 1980s climate change appeared on the agenda in international politics³ but only since the end of the Cold War the climate change debate has shifted into the focus of concern in foreign policy circles⁴ until it was swept away by an omnipresent War on Terror after September 11. The United States, as the world's largest polluter⁵ to climate change - US emissions of CO₂ exceed those of all other countries⁶ plus on a per capita basis US CO₂-emissions are the highest off all countries⁷ - plays a major, if not the decisive, role in international environmental politics and the dialogue for a global strategy to address...
