The purpose of this investigation is to resolve the drainage problems of the San Joaquin Valley. As in most semi-arid areas in which irrigated agriculture is practiced, the drainage problems of the Valley have been handled on a local and not a basin-wide scale. The beginning of the Drainage Investigation indicated that drainage was finally being thought of as a problem of the total basin not just a problem of the unfortunate few. Several phases of the SJVDI, primarily the Quality and Treatment Studies, are of such a nature that they merit separate publication. For this reason a special series of bulletins has been created under the general heading of Bio-Engineering Aspects of Agricultural Drainage. Bulletin Number 174-1, the first of the series, was entitled, The Fate of Pesticides Applied to Irrigated Agricultural Land. It reported on studies being conducted on an...
