Open University Press. Paperback. Book Condition: new. BRAND NEW, Essential Calculation Skills for Nurses, Midwives and Healthcare Practitioners, Meriel Hutton, "Just as the title says this book is an essential 'must have' for any student healthcare professional or even those who are qualified and want to refresh their calculation skills. It is very easy to read, being clearly laid out and aided with illustrations and photographs throughout. There is also a variety of worked examples and practice questions which I feel makes this book stand out from the crowd, as you can assess yourself as you go along to check that you are on the right track. As a child branch nursing student, I particularly loved how this book covers specific scenarios in paediatrics, from the use of graphs when plotting growth charts to infant fluids, including all types of infant feeds (bolus, continuous or intravenous). There are also worked examples and practice questions for more specialist areas such as high dependency, neonates and paediatric intensive care unit." Cheryl McCullough, Student Nurse, Queens University Belfast, UK "This book has been an enormous help throughout revision time. It is a simple guide to learning a variety of calculations such as division, multiplications, ratios, and percentages; all of which are in constant use in healthcare settings. The book is well crafted, composing of easy to understand terms and techniques to carry out calculations. It uses scenarios which cater specifically for nurses and other healthcare professions by using common drugs and dosages. It also offers tips on medication safety and attempts to integrate practice with theory by including Nursing and Midwifery codes and NHS guidelines." Erin Tierney, Nursing Student, Swansea University, UK "This book is suitable for those preparing for entry to healthcare programmes as well as those undertaking pre-registration programmes, post-registration courses...
